

App. No. 10/065,898

**In the Claims:**

1-21 (cancelled)

22. (new) A device to increase the horizontal surface of the shower bath comprising:

A corner mounted tray triangular in shape that attaches to the upper surfaces of shower bath walls above the shower head which has a perforated bottom surface, upstanding sidewalls and angled front wall.

23. (new) A device according to Claim 22 in which said tray is supported on top of the walls in a corner between two walls.

24. (new) A device according to Claim 22 which is attached to said walls by a plurality of screws.

25. (new) A device according to Claim 22 in which said bottom surface has a 2 degrees draft for drainage towards the front of said tray.

26. (new) A device according to Claim 22 in which said two side walls with a curved edge with said side walls being at 90 degrees from said bottom surface with each sidewall having a hole for an attaching means with said hole being above said bottom surface.

27. (new) A device according to Claim 26 with said side walls being 5 inches long and 1 inch tall

28. (new) A device according to Claim 22 in which the back corner of said tray is open allowing easy cleanup and backward drainage.

29. (new) A device according to Claim 22 in which each said sidewall has a hole for a connecting means.

30. (new) A device according to Claim 29 in which said connecting means is a screw.

31. (new) A device according to Claim 22 in which said side walls do not extend all the way to the corner to allow for fluid drainage on each side.

32. (new) A device according to Claim 22 in which said tray is used to hold shower and bathroom accessories above the shower head.

33. (new) A device according to Claim 22 in which said tray is used to hold accessories on upper surfaces of shower and bath walls.

34. (new) A device according to Claim 22 in which said tray is used to increase the horizontal surface of shower and tubs.

35. (new) A device according to Claim 22 in which said tray is used to keep harmful objects and products out of the reach of young children.

36. (new) A device according to Claim 22 in which said tray is used as a removable storage utility for shower and baths.

App. No. 10/065,898

37. (new) A device to convert unusable horizontal surface above the showerhead into usable weight bearing surface comprising:

A corner mounted tray triangular in shape that attaches to the upper surfaces of shower bath walls which has a perforated bottom surface, upstanding sidewalls, angled front wall, in which said tray is supported on top of the walls in a corner between two walls and is attached to said walls above the showerhead by a plurality of connecting means, which said two side walls with a curved edge at a 90 degree angle in relation to said bottom surface, which said bottom surface has a 2 degrees draft which allows the fluids and water to drain towards the front and not towards the corner and said side walls do not extent all the way to the corner to allow for fluid drainage on each side.

38. (new) A device according to Claim 37 in which said screw holes are different from each other.
